## General Blending Instructions (more instructions can be found online)

Blending Cosmetic Bases is easier than you may think. All of our bases have been created to support easy blending.

**Blending 1 - 5 Litres:** Simply measure you desired amount of Cosmetic Base into a bowl and add essential oils, carrier oils and actives by stirring. When all is mixed then bottle.

**Blending an Individual Bottle:** Blending is so easy, you can blend direct in the bottle. Fill a bottle with the desired amount of Cosmetic Base and then, ensuring there is enough space left in your bottle, add essential oils, carrier oils and actives. Place a cap on the bottle and agitate by vigorous shaking until fully mixed.

**How much can you blend?:** We have created our bases to take 3% Essential Oils\*, 5% Carrier Oils\*\* and 1% Active Ingredient. This isn't to say our bases cannot take more than this, but you will need to satisfy yourself that the resultant product is stable.

\*Liquid Soap is a maximum 1% Essential Oil, \*\*Shower Gel Clear, Shampoo Clear we do not recommend exceeding 1% Carrier Oil
